To Whom It May Concern:

This transmission includes responses to the NUREG-1556 Appendix D questionnaire that was requested by Jim Montgomery (U.S. NRC, Region IV) on June 5, 2007. The questionnaire was completed by Navajo Mine and reviewed by Energy Technologies Inc. (ETI), the vendor distributing the on-line coal analyzer system. Please note that all of the responses are in the "suggested response" field because the RSO trainers and the product vendors have thorough knowledge of NUREG-1556.

The following information outlines the distributors of the radioactive sources, their radioactive material license number, and their address on record with the radioactive material license.

Americium -241 & Cesium-137

Energy Technologies Inc. (ETI)

8819 Joe Daniels Road

Knoxville, TN 37931

Material License: R-47148-D08 (issued by TN Dept. of Environment & Conservation)

Californium-252

Thermo Gamma Metrics

10010 Mesa Rim Road

San Diego, CA 92121

Material License: 3775-37 (issued by CA Dept. of Health Services)

Please note that the RSO training will be conducted by both ETI and Thermo Gamma Metrics since they each will be providing radioactive materials.

Regards,

A handwritten signature in black ink, appearing to read "Dustin Fisher", with a long horizontal line extending to the right.

Dustin Fisher

Mining Engineer
